EXAM PROCEDURES

I pass this sheet out in advance so that you can become familiar with it ahead of time and this will avoid hassles over grading procedures.

1. Bring your student ID card to all exams!
2. On each test circle your TA's name and put your own name on every page.
3. Be sure you know your exam room and time well before the exam.
4. In general, 15 points out of 25 on an exam problem will be given for a barely satisfactory performance.
5. Your answer must be circled. It should not be up to the grader to find the correct answer among several possibilities.
6. For problem 1, single answer questions, put the answer in the blank provided. These questions will be graded on a right/wrong basis. The answers require units.
7. We will not regrade any exam worked in pencil!
8. Work neatly and carefully so that the grader can follow your line of thinking. Show all work. Cross out false starts. Do not expect us to read your mind.
9. Explain in words what you are doing. A few words can make the grader's life simpler and your score higher.
10. Work problems algebraically first, and then insert numerical values at the end. This is good practice always, as it minimizes errors along the way. It also makes it easier for a grader to follow what you are doing and give appropriate partial credit.
11. All numerical answers require the proper units and are incomplete without them. Report numerical answers to the proper number of significant figures only, not more or less. There will be a penalty for over- or under-reporting significant figures.
12. If necessary, copy the problem over before turning it in. There are extra sheets available.
13. DO NOT BRING SCRATCH PAPER!!! It will be provided.
14. The correct answer is NOT enough. You must show clearly how you arrived at the answer in order to receive full credit. This does not apply to problem 1, single answers, which are graded right/wrong based on the answer.
15. Where appropriate, use a drawing. Make the drawing larger, rather than smaller. Indicate clearly on your drawing, where appropriate, your choice of sign convention.
16. Any dispute over grading must be brought to the attention of the instructor BEFORE the next exam.
17. Do not write with red pen or pencil.
18. Unless a general announcement is made, the exam stands as written.
19. DO NOT work problem 3 on the back of problem 2. The exams are taken apart for grading. Staple EXTRA SHEETS to the problem to which they apply, in the upper right-hand corner.
20. One and one only, 3 × 5 card for midterms.
