HIGH-ENERGY ASTROPHYSICS
at the
UNIVERSITY OF UTAH

The Physics Department at the University of Utah is seeking qualified candidates for a senior-level tenure track position in high-energy Astrophysics. Preference will be given for hiring at the full Professor level. We seek candidates with experience in experimental and/or observational aspects of astrophysics. The selected candidate will bring a strong, independent research program anchored to a new, major high-energy astrophysics project such as the AUGER Observatory. The successful applicant will have a strong, demonstrated commitment to both teaching and research, and will develop his/her own independent research program. Potential collaboration with existing astrophysics research efforts at the University of Utah is possible. The University is a major participant in several high-energy astrophysics projects, including the VERITAS Observatory, the Telescope Array, and the High-Resolution Fly's Eye Observatory, and also maintains a strong computational/theoretical High Energy Astrophysics research effort. This appointment requires teaching undergraduate/graduate courses in Physics and/or Astronomy.

We expect that the successful candidate will be interviewed in Fall 2004 and will begin his/her appointment by early/mid 2005. Each candidate should submit his/her curriculum vitae, statement of research interests, and a minimum of three letters of recommendation by September 1, 2004 to:

HIGH ENERGY ASTROPHYSICS SEARCH COMMITTEE
DEPARTMENT OF PHYSICS
UNIVERSITY OF UTAH
115 SOUTH 1400 EAST #201
SALT LAKE CITY, UT 84112-0830

The search committee reserves the right to consider applications received after this closing date.
