

ICECUBE MASTERCLASS

AN AUTHENTIC ASTROPHYSICS RESEARCH EXPERIENCE

[ICECUBE.WISC.EDU/MASTERCLASS](https://icecube.wisc.edu/masterclass)

APRIL 27, 2024

9:30am – 5:10pm

UNIVERSITY OF UTAH, SALT LAKE CITY

ICECUBE MASTERCLASS

An Authentic Astrophysics Research Experience

Join **IceCube scientists** in a collaborative analysis of IceCube data and learn from researchers why a science career is an interesting—even fun!—and, most of all, real option for you.

Learn about IceCube, a cubic-kilometer detector at the South Pole, and about how tiny particles, called cosmic rays and neutrinos, can help us explore the extreme universe.

Audience

IceCube Masterclass is intended for high school students, sophomore level and above. Prior physics experience is helpful, but not required. Diversity is key to the success of our science; therefore, we encourage students of all backgrounds to apply. High school teachers are welcome to attend with their students.
